Report on Medical School

The Co-chairmen of the Planning and Zoning Committee, Dr. Reynolds Burch and Ernest Erber, and the Co-chairmen of the Subcommittee on the Medical School, Alan Sagner and Robert Curvin, met yesterday and agreed to make this report to the Committee of Concern.

1. They were pleased to note the progress that has been made in recent weeks toward resolving the differences over the Medical School site, especially as a result of the reduction of land area required. We recommend that the Committee of Concern use its good offices to expedite a final agreement acceptable to all interests involved, especially to the groups and individuals living within and adjacent to the site.

2. They request the Executive Committee of the Committee of Concern to ascertain the current status of the various legal instruments, specifically the agreement between the Board of Trustees and the City of Newark and the ensuing legislative enactment, as they relate to recently announced reductions in site area.

3. They recommend, further, that the Committee of Concern form a Relocation Review Committee, including representatives of groups on record in opposition to announced relocation plans, to review relocation plans and to be responsive to complaints and objections from residents of the site area regarding relocation plans and their implementation.

Ernest Erber
On behalf of the above-named
Committee and Subcommittee
Chairmen.
